Can I use it, so it will be a multi-PT on my own homepage? Is it possible to "add" a lapop on this lapop that I already have? If yes, can I use a lapop on a different tracker that is already activated on another lapop? A: Yes, you can. You can register as many PT4 as you want. Yes, it is possible. Click the 'Add new lapop' button and then just choose the lapop that you have already activated and then set it to the one that you want to replace. Yes, you can. In developing countries, the more successful programmes to control malaria in pregnancy have been those that are based on ensuring that the most vulnerable pregnant women are identified and given prompt treatment. These programmes have not been implemented in South Africa due to the poor socioeconomic status of the majority of pregnant women in this country. Thus the risk of malaria in pregnancy is greater in this population than anywhere else in the world. However, there is a relative lack of data in this field and no one has followed up the mother-baby pair after delivery. The aims of this study are: To determine the proportion of neonates born to mothers who were parasitaemic at delivery and to identify risk factors that are associated with neonatal malaria infection; and to determine the proportion of women infected with Plasmodium falciparum and to identify risk factors that are associated with maternal P. falciparum infection. To achieve these aims, a community-based prospective study will be conducted in Gauteng Province, South Africa, where antenatal care is provided mainly by private health-care providers and the socioeconomic status is lower than elsewhere in the country. A sample of 2500 women who have had at least one antenatal visit will be recruited for the study. At recruitment, consenting women will be interviewed to determine their socio-demographic characteristics and access to antenatal care. A sample of 400 women will have their peripheral blood taken for malaria diagnosis, and will provide a sample of their placenta for histopathological analysis. After delivery, consenting mothers will 82157476af
